Astro Maids — Dallas Operations Manual

Residential, Short-Term Rental & Light Commercial Cleaning — Dallas, Texas

Document Control

Field	Value
Document ID	AM-OPS-001
Version	1.0
Effective Date	_____
Owner	Astro Maids Operations, Dallas, TX
Applies To	The Dallas flagship location and every future licensed or franchised location
Review Cycle	Annual, or upon any material process, pricing, or chemical change
Confidentiality	Proprietary — for owner and employee use only. Do not distribute.

Pre-offer notice. Astro Maids is exploring franchising. This manual documents how the Dallas operation runs today. It is not a Franchise Disclosure Document, and nothing in it is an offer to sell or the solicitation of an offer to buy a franchise. Fields marked **[LOCAL]** or shown as blank fill-in lines must be completed by the owner with real supplier, insurance, and regulatory information before the manual is distributed to staff.

12. North Dallas and Collin County Market Playbook
13. Appendices (Forms & Templates)

1. Introduction & Purpose

This Operations Manual is the single source of truth for how a Astro Maids location delivers cleaning services. Its purpose is to:

- Guarantee a **consistent, replicable customer experience** in every home, regardless of who performs the work.
- Protect the brand through standardized quality, safety, and professionalism.
- Reduce liability by codifying safe chemical use, equipment handling, and client-property protocols.
- Provide a structured onboarding path so a new hire can reach unsupervised work quickly and safely.
- Give the owner and field supervisor objective tools — checklists and scorecards — to audit performance and coach crews.

Manual ownership. Cleaning standards, the approved chemical list, and the QA scorecards are brand-wide and may not be altered locally. Owners may append local supplier contacts, insurance details, and market-specific add-ons in the **[LOCAL]** fields.

Distribution. Every technician, team lead, supervisor, and owner must acknowledge receipt and completed training on the Training Sign-Off Log (Appendix D) before performing unsupervised work.

2. Brand Standards & Service Promise

2.1 Core service promise

> "A Astro Maids home is clean the way a neighbor would clean it for you — thorough, careful, and finished. Same crew standard, every home, every visit."

Astro Maids is locally owned and operated. Customers reach real people in Dallas, never a call center. That promise is a brand standard, not a slogan: phone, text, and email inquiries are answered by a local person.

2.2 Non-negotiable standards

Standard	Description
Punctuality	Arrival within the scheduled arrival window; the client is notified immediately of any delay
Uniform & ID	Branded shirt, visible name badge, closed-toe non-slip shoes at all times
Two-person minimum	Standard residential cleans are staffed with at least 2 technicians unless the client or contract specifies otherwise
Top-to-bottom, back-to-front	Every room is cleaned from ceiling fixtures down to floors, and from the far wall back toward the exit
Detail consistency	Every checklist item is completed on every visit — nothing is skipped because a room "looks clean"
Client property respect	No client-supplied chemicals without a signed waiver; no relocating personal items, only cleaning around them; pet and child safety awareness at all times
Photo documentation	Before/after photos of kitchens and bathrooms logged for every visit, with client consent
Leave-behind note	A completed service card left at the exit on every visit
Pets are guests	Every pet on the account is known by name before the crew arrives (see the pet profile in Section 8)

2.3 Service lines and current Dallas pricing

Every base price includes a **2 bedroom / 2 bathroom** home. Extras are charged only above that baseline. Half baths bill at half rate. These figures are the live Dallas rates and are the same numbers the website quote engine uses.

Service	Base (2bd/2ba)	Per extra bedroom	Per extra bathroom	Recurring discounts
Standard Clean	$169	$20	$15	Yes
Bright Clean	$229	$25	$20	Yes

Service	Base (2bd/2ba)	Per extra bedroom	Per extra bathroom	Recurring discounts
Deep Clean	$329	$35	$30	No
Airbnb Turnover	$149	$20	$15	Yes
Move In / Out	$359	$40	$30	No
Pre-Event Prep	$189	$25	$20	No
Post-Event Clean	$219	$25	$20	No
Office & Commercial Clean	$245	$25	$20	Yes

Frequency discounts (recurring-eligible services only): Monthly 10%, Biweekly 15%, Weekly 20%.

Host Weekend bundle: Pre-Event Prep plus Post-Event Clean booked together, 10% off the combined total.

Quoted range: every automated quote presents a range — the calculated price to that price plus 15% (minimum $25) — to absorb condition, pets, and clutter. Crews must flag any home whose real condition exceeds the high end **before** starting, not after.

Service line	What it is	Typical Dallas use
Standard Clean	The recurring maintenance clean; full checklist minus deep-only items	Weekly/biweekly households
Bright Clean	Standard plus the highest-impact deep items (baseboards, interior glass, detail dusting)	First visit for a new recurring client
Deep Clean	Full checklist plus all deep add-ons	Quarterly resets, seasonal, first-time neglected homes
Airbnb Turnover	Fast, checklist-driven reset with linens, restock, staging, damage report	Collin County short-term rentals
Move In / Out	Full deep clean of a vacant property including insides of cabinets and appliances	Realtor and tenant turnovers
Pre-Event Prep	Guest-ready focus on entry, kitchen, bathrooms, and living areas	Holidays, graduations, showers
Post-Event Clean	Rapid reset after a party, including trash-out and spot treatment	The morning after
Office & Commercial	Light commercial recurring clean; "bedrooms" bills as private offices, "bathrooms" as restrooms	Clinics, salons, storefronts

2.4 Out of scope (all service lines)

Biohazard or crime-scene cleanup, hoarding remediation, mold remediation, pest infestation

cleaning, exterior/roof/gutter work, wet carpet or upholstery extraction, moving heavy furniture, pet waste beyond a single incidental accident, and anything requiring a ladder above the second step of a step stool. When a job is out of scope, the crew stops, documents with photos, and calls the supervisor — the crew never negotiates scope or price on site.

3. Team Structure & Roles

Role	Core responsibilities
Cleaning Technician	Executes checklist procedures as trained; reports damage and hazards immediately; maintains assigned equipment
Team Lead	Runs a 2–4 person crew; assigns rooms; completes the pre-departure self-inspection; is the client's on-site point of contact
Field Supervisor / QA Auditor	Runs scheduled and unannounced audits with the Section 10 scorecards; coaches; handles escalations
Owner / General Manager	Hiring, scheduling, procurement, local compliance, marketing, and P&L; monitors the admin dashboard daily
Brand Operations	Maintains this manual, the approved lists, the training curriculum, and the software platform

Span of control: one Field Supervisor per 6–10 active crews. Every crew has a designated Team Lead with at least 90 days of tenure and a passing QA audit (90+, Section 10.1).

Daily rhythm for the owner. Open the admin dashboard each morning: new bookings, new leads, returning-contact alerts, change requests, and applications. Anything in "new" status older than one business day is a service failure of the office, not of the crew.

4. Standardized Cleaning Checklists by Service Type

These master checklists are the basis for the room procedures in Section 5. Every item is checked off in the service app or on the paper form (Appendix A) before a visit is marked complete.

4.1 Master checklist legend

- **S** = included in a **Standard** (recurring) clean
- **B** = included in a **Bright Clean**
- **D** = **Deep Clean** item
- **M** = **Move-In / Move-Out** exclusive item
- A dash means the item does not apply to that tier.

4.2 Whole-home checklist (applies to every room)

Item	S	B	D	M
Dust ceiling fans, light fixtures, and vents	S	B	D (detailed blade wipe)	M
Remove cobwebs from corners and ceilings	S	B	D	M
Dust and wipe all reachable surfaces, decor, and picture frames	S	B	D	M
Disinfect light switches and door handles	S	B	D	M
Spot-clean interior doors and door frames	S	B (full wipe)	D (full wipe)	M
Vacuum carpets and rugs, edges included	S	B	D (furniture moved)	M
Sweep and mop all hard floors	S	B	D	M
Empty all trash bins and replace liners	S	B	D	M
Wipe baseboards	—	B	D	M
Clean interior windows and sills	—	B	D	M
Clean window tracks	—	—	D	M
Wipe blinds and shutters	—	—	D	M
Clean behind and under safely movable furniture	—	—	D	M

4.3 Kitchen checklist

Item	S	B	D	M
Clear and wipe all counters and backsplash	S	B	D	M
Clean exterior of all appliances	S	B	D	M
Clean interior of microwave	S	B	D	M
Clean stovetop, grates, and control knobs	S	B	D	M
Clean and shine sink and faucet	S	B	D	M
Wipe cabinet fronts and handles	S	B	D	M
Wipe small appliance exteriors	S	B	D	M
Empty and reline trash and recycling	S	B	D	M
Interior of oven	—	—	D	M
Interior of refrigerator (client-emptied)	—	—	D	M
Interior of dishwasher wiped, filter checked	—	—	D	M
Interior of all cabinets and drawers	—	—	—	M
Degrease range hood and filter	—	—	D	M

4.4 Bathroom checklist

Item	S	B	D	M
Clean, disinfect, and shine toilet (bowl, seat, base, tank, behind hinges)	S	B	D	M
Scrub and disinfect tub/shower including tile and glass	S	B	D	M
Descale and polish fixtures and shower head	S	B	D (deep descale)	M

Item	S	B	D	M
Clean and disinfect sink, faucet, and counter	S	B	D	M
Clean mirror streak-free	S	B	D	M
Wipe cabinet exteriors and drawer fronts	S	B	D	M
Straighten or restock towels (client-provided)	S	B	D	—
Empty trash and reline	S	B	D	M
Detail grout and caulk lines	—	—	D	M
Dust exhaust fan cover	—	B	D	M
Interior of cabinets and drawers	—	—	—	M

4.5 Bedroom checklist

Item	S	B	D	M
Make bed or straighten linens (change sheets only if provided/requested)	S	B	D	—
Dust all furniture, nightstands, and dressers	S	B	D	M
Dust headboard and frame	S	B (detail)	D (detail)	M
Vacuum floors including under bed where accessible	S	B	D (bed moved)	M
Empty trash bins	S	B	D	M
Neaten visible clutter without relocating personal items	S	B	D	—
Wipe closet interiors and dust shelving	—	—	D	M
Clean windows, sills, and tracks	—	B (sills)	D	M

4.6 Living and common area checklist

Item	S	B	D	M
Dust and wipe furniture, shelving, and electronics exteriors	S	B	D	M
Fluff and straighten pillows and throws	S	B	D	—
Clean glass surfaces (tables, TV stands)	S	B	D	M
Dust electronics with dry microfiber only	S	B	D	M
Dust fireplace mantle and surround (ash removal excluded)	S	B	D	M
Vacuum and mop floors	S	B	D	M
Surface-vacuum upholstery (no wet extraction)	—	B	D	M
Clean interior windows and sills	—	B	D	M

4.7 Laundry and utility checklist

Item	S	B	D	M
Wipe washer and dryer exteriors and tops	S	B	D	M
Clean lint trap area exterior	S	B	D	M
Wipe utility sink	S	B	D	M
Sweep and mop floor	S	B	D	M
Wipe interior of washer drum, leave door ajar to dry	—	—	D	M
Wipe shelving and cabinets	—	—	D	M

4.8 Entry, hallway, and stairs checklist

Item	S	B	D	M
Sweep, vacuum, and mop entry flooring	S	B	D	M
Disinfect handrails	S	B	D	M

Item	S	B	D	M
Dust wall art, mirrors, and light fixtures	S	B	D	M
Vacuum stair treads and edges	S	B	D (detail edges)	M
Clean glass on entry and storm doors	S	B	D	M
Shake out or vacuum entry mats	S	B	D	—

4.9 Airbnb turnover checklist (Collin County standard)

A turnover is not a light clean — it is a **reset to a photographed standard** under a hard deadline. The crew works the full Standard checklist for the property plus everything below.

Arrival

- Confirm checkout has occurred and note the departure time.
- Walk the unit with the phone camera before touching anything; photograph any damage, stains, missing items, or excessive mess. This is the damage record and must be filed the same day.
- Bag and remove all guest trash, food, and left-behind items; left-behind valuables are bagged, labeled with the unit and date, and returned to the host.

Linens and beds

- Strip all used linens and towels; count them out and count replacements in.
- Inspect every sheet, pillowcase, duvet cover, and towel under light for stains, hair, and tears. Anything questionable is pulled from service, not re-hung.
- Make every bed to the staging photo: mattress protector, fitted sheet, flat sheet, duvet, pillow count and arrangement, throw placement.
- Check under beds and behind headboards for guest items.

Kitchen reset

- Empty and wipe the refrigerator, discarding all guest food unless the host directs otherwise.
- Run and empty the dishwasher; every dish, glass, and utensil is put away clean and dry.
- Verify inventory against the host's kitchen list; note shortages in the report.
- Reset coffee station, trash liners, and dish soap.

Bathrooms

- Full bathroom procedure, then stage: folded towel set per the photo, fresh soap and paper, toilet paper spare visible, hair dryer coiled and stored.

Restock (host-supplied consumables)

- Toilet paper, paper towels, hand soap, dish soap, dishwasher pods, laundry detergent, trash

bags, coffee, filters, sugar, creamer, water if provided.

- Anything at or below par level is listed in the turnover report the same day.

Staging and final

- Match the listing photos room by room: pillow arrangement, remote placement, chair angles, blinds position, lights and thermostat setting per host instruction.
- Check batteries in remotes and smoke detectors when the host requests it.
- Confirm the welcome materials, lockbox code card, and house rules are present and clean.
- Photograph every finished room and submit the turnover report: photos, damage notes, restock needs, and any maintenance issue (leaks, burnt bulbs, AC problems).

Turnover report — required fields: property, date, crew, checkout condition rating (1–5), damage found (Y/N + photos), items left behind, linens pulled from service, restock needed, maintenance flags, time in / time out.

4.10 Post-event clean checklist

Booked as Post-Event Clean; typically same-day or next-morning after a gathering.

- Full trash-out first: bag and remove all party waste, bottles, cans, and food to the client's bins or, when contracted, off site.
- Collect and consolidate dishware, glassware, and serving items; run dishwasher loads and hand-wash what cannot be machine washed.
- Spot-treat carpet and upholstery spills immediately (blot, never scrub; no wet extraction — flag anything beyond spot treatment).
- Sticky-surface pass: counters, tables, bar tops, cabinet fronts, refrigerator handles, light switches, and door handles.
- Remove decorations, tape, and confetti only when the client authorizes it in the booking notes.
- Bathrooms receive the full bathroom procedure with extra restock (paper, soap, towels).
- Floors last: sweep, vacuum edges and corners for crumbs and glitter, then mop.
- Final: outdoor entry and patio area tidied if in scope, all removed waste accounted for, home returned to its normal furniture layout.

4.11 Apartment and property-management turn checklist

Booked through the apartment turnover service line; the client is a property manager, not a resident, and the unit must be **lease-ready**.

- Confirm unit number, access method, and turn deadline with the property office before starting.
- **Trash-out:** remove everything the previous resident left, including closets, patio, and storage; document anything too large for the crew and notify the office immediately.
- Full Move-In/Move-Out checklist for every room, including insides of all cabinets, drawers,

closets, and appliances.

- Wipe all baseboards, door frames, switch plates, and outlet covers.
- Clean all window tracks, sills, blinds, and interior glass.
- Clean HVAC vent covers; note filter condition (crews do not replace filters unless contracted).
- Wipe out the water heater and utility closets; sweep balconies and patios.
- Spot-treat wall marks; photograph any damage or paint needs rather than attempting repair.
- **Unit-ready photo set:** every room, both bathrooms angles, inside the refrigerator and oven, and the entry. Photos are attached to the turn report for the property manager.
- **Key handoff:** keys, fobs, and access cards returned to the office and logged by name, unit, date, and time. Never leave keys inside the unit or in the lockbox without written instruction.
- Turn report: unit, crew, time in/out, trash-out volume, damage found, maintenance flags, photo set attached.

5. Room-by-Room Cleaning Procedures

Each procedure follows the top-to-bottom, back-to-front method and references approved chemical codes (Section 6) and tools (Section 7). The sequence matters — it prevents recontaminating surfaces already cleaned.

5.1 Kitchen procedure

1. Clear counters of small items; place dishes in the sink or dishwasher per client preference.
2. Dust light fixtures, cabinet tops, and vents (extendable duster, dry).
3. Wipe upper cabinet exteriors and the microwave interior (C-2, yellow microfiber).
4. Clean stovetop, knobs, and backsplash (C-2; finish glass cooktops with C-6 after degreasing).
5. Wipe appliance exteriors, following the grain on stainless steel (C-5).
6. Clean and disinfect countertops (C-1, yellow microfiber) and observe the label dwell time.
7. Clean and shine the sink and faucet, removing water spots (C-2, then C-5 for shine).
8. Wipe lower cabinet fronts and handles.
9. Sweep, then mop with C-3 (flat mop, green pad).
10. Empty trash, reline, and wipe the bin rim and exterior.
11. Final check: no streaks on stainless, no standing water, no crumbs at floor edges.

5.2 Bathroom procedure

1. Apply C-4 to the toilet bowl, exterior, and base; allow the full label dwell time (5 minutes minimum) while other work proceeds.
2. Dust light fixtures, exhaust fan cover, and mirror frame.
3. Spray and scrub tub, shower walls, tile, and glass with C-4. For hard water and soap scum, use C-7 on fixtures and glass — **never** applied to the same surface as C-4 without a full rinse in between (see 6.4).
4. Rinse and squeegee glass and tile; dry with red microfiber to prevent spotting.
5. Clean and disinfect the sink, faucet, and counter with C-4 (red microfiber — bathroom only).
6. Return to the toilet: scrub the bowl, wipe the seat, lid, base, and behind the hinges, then the tank and flush handle last.
7. Clean the mirror streak-free with C-6 and a blue microfiber.
8. Wipe cabinet exteriors.
9. Empty trash and reline.
10. Sweep and mop the floor last, working backward out of the room (C-3, or C-4 where disinfection is needed).
11. Final check: no hair in drains or corners, no soap film, streak-free glass, grout free of visible mildew.

Cross-contamination rule. Red microfiber and toilet brushes are bathroom-only and never enter a kitchen. Color coding is mandatory brand-wide (Section 7.3).

5.3 Bedroom procedure

1. Open blinds and curtains; dust window treatments.
2. Dust ceiling fan blades and light fixtures top-down.
3. Make the bed: straighten and tuck sheets, fluff pillows, fold throws.
4. Dust all furniture with a damp yellow microfiber; use C-8 on finished wood only.
5. Dry-dust electronics — never spray chemical toward a screen or vent.
6. Empty and reline trash bins.
7. Neaten visible clutter; place stray items together on a visible surface, never hidden away.
8. Vacuum edge-to-edge including accessible under-bed area; sweep and mop hard floors with C-3.
9. Final check: bed made to standard, flat surfaces dust-free, floor clean to the edges.

5.4 Living and common area procedure

1. Dust ceiling fixtures, fan blades, and upper shelving.
2. Dust and wipe furniture, entertainment centers, and decor (C-8 for wood, dry cloth for electronics).
3. Fluff cushions and pillows; fold blankets.
4. Surface-vacuum upholstery with the correct attachment — no wet cleaning.
5. Clean glass tabletops with C-6 on the cloth; screens get a dry or barely damp microfiber only.
6. Wipe baseboards on Bright and Deep cleans.
7. Vacuum fully, then mop hard flooring with C-3.
8. Final check: cushions arranged as the client keeps them, no dust visible under direct light, corners free of debris.

5.5 Home office procedure

1. Dust light fixtures and shelving.
2. Dust around — never move — papers, files, and documents without explicit permission.
3. Wipe non-electronic surfaces with C-1.
4. Dry-dust monitors, keyboards, and printers; no liquid near electronics.
5. Empty trash and recycling.
6. Vacuum and mop.
7. Final check: papers undisturbed, cables as found, surfaces dust-free.

5.6 Move-in / move-out additional steps

1. Confirm the property is vacant, or note occupied areas to skip, before starting.
2. Complete every **M** item in Section 4 for every room.
3. Clean the interior of every cabinet, drawer, and closet — vacuum shelving before wiping.
4. Clean the interior of all major appliances.

5. Clean all window tracks, sills, and interior glass.
6. Wipe every baseboard, door frame, and switch plate in the property.
7. Spot-treat wall marks with C-9, tested in an inconspicuous area first. Do not use on flat or freshly painted walls without written approval.
8. Final walkthrough with photo documentation of every room for the client, landlord, or property manager record.

5.7 Airbnb turnover procedure (time-boxed)

Turnovers run to a clock. The target sequence for a 2bd/2ba lake unit is 90–120 minutes with two technicians:

1. **0–10 min — Document and strip.** Photo walk, trash-out, strip all linens and towels into the laundry bag, start the first wash if the unit has a laundry.
2. **10–25 min — Kitchen reset.** Refrigerator emptied and wiped, dishwasher started or emptied, counters and appliances cleaned, inventory checked.
3. **25–55 min — Bathrooms.** Full Section 5.2 procedure in each bathroom, then staging.
4. **55–80 min — Bedrooms and living.** Beds made to the staging photo, dusting, glass, surfaces.
5. **80–100 min — Floors and staging.** Vacuum and mop through the unit ending at the door; final staging against the listing photos.
6. **100–120 min — Report.** Photo set, damage notes, restock list, maintenance flags submitted before leaving the property.

If a turnover cannot be completed to standard before the next check-in, the Team Lead calls the supervisor immediately. The supervisor — never the crew — communicates with the host.

6. Approved Chemicals List

Compliance note [LOCAL]. Maintain a Safety Data Sheet (SDS) for every product carried, in a binder or digital folder accessible to all staff at all times, per the OSHA Hazard Communication Standard (29 CFR 1910.1200). Verify current federal, Texas, and municipal requirements with your counsel and insurance broker before stocking. Product brands are an owner decision — record the exact products purchased in the fill-in column so the SDS binder and this manual agree.

6.1 Master chemical reference table

Code	Category	Approved use	Application	Surfaces	Key safety note	Product carried [LOCAL]
C-1	Multi-surface disinfectant cleaner	Counters, switches, handles	RTU or per label	Sealed counters, plastic, laminate	Honor the labeled dwell time or the disinfection claim is void	_____
C-2	All-purpose degreaser	Kitchen grease, stovetops, hoods	Diluted per label	Painted/sealed surfaces, appliance exteriors	Ventilate; not for unsealed wood or marble	_____
C-3	Neutral pH floor cleaner	Routine mopping	Diluted in bucket, changed when dirty	Tile, vinyl, sealed hardwood, laminate	Never on unsealed hardwood without client-approved product	_____
C-4	Disinfectant bathroom cleaner	Toilets, tubs, showers, counters	RTU, dwell per label	Porcelain, tile, fiberglass, sealed grout	Never mixed with C-7 or any acid	_____
C-5	Stainless steel / metal polish	Appliance exteriors, fixtures	Light application, buff dry	Stainless, chrome	Apply to the cloth, not the surface, near food prep	_____
C-6	Glass & mirror cleaner (ammonia-free)	Mirrors, windows, glass, shower doors	Spray and squeegee	Glass, mirror	Ammonia-free required where windows are tinted	_____
C-7	Acid descaler / lime & scale remover	Hard-water buildup	Spot apply, rinse thoroughly	Chrome, porcelain, glass	Never with bleach or C-4; never on marble or granite	_____
C-8	Wood-safe furniture polish	Wood dusting and polish	Light spray on cloth, buff	Sealed, finished wood	Ask first on antique, oiled, or unfinished wood	_____

Code	Category	Approved use	Application	Surfaces	Key safety note	Product carried [LOCAL]
C-9	Wall and spot cleaner	Wall marks, baseboards	Diluted, spot-test first	Painted walls, baseboards	Test hidden area; avoid matte paint without approval	_____
C-10	Green-certified all-purpose cleaner	Client-requested green clean	Per label	General surfaces	Must be Green Seal or EPA Safer Choice certified	_____
C-11	Hand soap / sanitizer (staff)	Hand hygiene	As provided	N/A	Mandatory between bathroom and kitchen tasks and between homes	_____

6.2 Prohibited and restricted substances

- **No mixing.** Bleach with ammonia or with any acid produces toxic gas. Chemicals are never combined outside manufacturer-labeled use.
- **No unlabeled or repackaged chemicals** in the field. Every bottle carries a secondary label.
- **No client-supplied chemicals** without a signed Client Chemical Waiver (Appendix E), a compatibility review, and an available SDS.
- **No abrasive powders or steel wool** on stainless, glass cooktops, natural stone, or fiberglass.

6.3 Green track [LOCAL]

Households with allergies, infants, or chemical sensitivity are offered the green line: C-1G through C-9G equivalents mirroring the categories above, using EPA Safer Choice or Green Seal certified products. Green-line accounts are flagged in the customer's home profile (Section 8) and the correct kit is confirmed loaded before departure.

6.4 Compatibility and storage chart

Chemical	Never combine with	Storage
Bleach-based products (if carried)	Ammonia, all acids including C-7, other disinfectants	Separate, ventilated, out of sunlight
C-7 acid descaler	Bleach, C-4, any ammonia product	Lowest shelf, secondary containment tray
C-1 / C-4 disinfectants	Acid descalers	Eye level for easy label checking

Chemical	Never combine with	Storage
All chemicals	—	Original caps and triggers on assigned bottles; never transfer between unlabeled containers

7. Approved Equipment & Supplies List

7.1 Per-crew equipment kit

Item	Quantity per crew	Notes
HEPA backpack or upright vacuum	1–2	HEPA required for allergen-sensitive clients
Flat microfiber mop system	1	Color-coded pads (7.3)
Extendable microfiber duster	1	Fans, vents, high shelving
Telescoping squeegee / window tool	1	Glass and shower doors
Chemical caddy	1 per technician	Organized by room zone
Toilet brush	1 per bathroom cleaned	Disinfected between homes; replaced every 90 days
Grout and detail brush set	1 set	Deep cleans and turns
Reusable gloves, color-coded	2 pairs per technician	Yellow kitchen/general, red bathroom
Trash liners, assorted	Stocked	Match the client's bin sizes
Step stool, non-marring	1	Nothing above the second step
Shoe covers	As needed	No-shoes households
Laundry bag set (turnovers)	2	Clean and soiled kept separate
Phone camera + charger	1 per crew	Photo documentation is a job requirement

7.2 Microfiber inventory standard

Color	Zone	Minimum stock per crew
Yellow	Kitchen and general surfaces	6
Red	Bathrooms only	6
Blue	Glass and mirrors	4
Green	Floors (mop pads)	4
White / grey	Wood furniture and polish	4

7.3 Color-coding system

Mandatory brand-wide: **yellow** kitchen and general, **red** bathrooms only, **blue** glass and mirrors, **green** floors. Cloths and pads are laundered separately by color after every shift — red never shares a load — and inspected for wear before every shift.

7.4 Vehicle and restocking standards [LOCAL]

Each vehicle carries a par level of chemicals and consumables sufficient for the day's route plus one buffer job. The owner establishes local supplier accounts and a weekly restocking check (Appendix F).

Local supply detail	Fill in
Primary chemical supplier	_____
Equipment supplier	_____
Linen / laundry provider (turnovers)	_____
Weekly restock day	_____

8. Technology: The Astro Maids Customer Pipeline

The software platform is a brand standard, not an optional tool. It is how the company holds a consistent customer experience without a call center. Every owner and supervisor is expected to be fluent in it.

8.1 How a customer becomes a job

`text
Ad / search / referral / Facebook / Nextdoor
|
Instant quote on the website -----> price range shown immediately
|
Booking request or quote request (office follow-up)
|
Confirmation email + internal alert to the office
|
Admin dashboard: assign, schedule, confirm
|
Reminder email before the visit --> crew performs the job
|
Customer account portal: history, rebook, change requests
`

8.2 The quote engine

Pricing lives in one place and every surface reads from it — the website pricing page, the booking wizard, the instant-quote page, the chat and voice assistant, and the emailed quote. **Prices are never quoted from memory.** If a crew, an owner, or an assistant produces a number that disagrees with the quote engine, the quote engine is right and the discrepancy is reported the same day.

A quote is built from: service line, bedrooms, bathrooms (half baths at half), frequency discount, and the +15% (minimum $25) upper band for condition.

8.3 Intake surfaces

Surface	Purpose	Where it lands
Instant quote (homepage and pricing page)	Self-serve price in seconds	Becomes a booking or a lead
Booking wizard	Full booking with address, date, and time-slot availability rules	Bookings
Instant quote page (/quote)	Distraction-free single-purpose form used in ad and email follow-up	Leads
Campaign landing pages	Seasonal offers	Leads, tagged by campaign
Apartment / property inquiry form	B2B turn work	Property inquiries
Careers form	Hiring	Applications
Franchise interest form	Ownership candidates	Franchise inquiries
Chat and voice assistant (Maggie)	Answers questions, quotes from the same engine, hands off to a form	Leads and transcripts

Returning contacts. If an email or phone number already exists, the new submission is appended to the existing record and logged as activity rather than creating a duplicate. The dashboard raises a "returning contacts" alert so the office sees that an existing customer updated details.

8.4 Attribution

Every submission stores UTM source, medium, campaign, referrer, and landing page. Marketing spend decisions are made from that data, not from impressions. Review source mix monthly.

8.5 Automated email program

Email	Trigger	Timing
Booking confirmation	Booking submitted	Immediate
Quote request received	Quote form submitted	Immediate
Internal alert	Any submission	Immediate to the office
Visit reminder	Upcoming scheduled clean	1 day before
Lead follow-up (instant quote invite)	New advertising lead	~3 minutes after the lead
Hiring follow-up	New job applicant	1–2 hours after the application
Campaign thank-you	Campaign lead	Immediate
Franchise candidate confirmation	Franchise interest submitted	Immediate

Templates are editable by the owner in the admin email center, including subject, hero copy, body, and footer. Two rules: every template must read correctly when optional fields are blank, and no template makes a claim the company cannot honor.

8.6 The customer account portal

Customers can create an account to see upcoming appointments, service history, and to rebook. The portal is also where the **home profile** lives, and the home profile is what the crew relies on:

- Entry method, entry code, lockbox location, alarm instructions, parking notes
- Rooms to focus on and rooms to skip
- Product and scent preferences, including the green track
- Supplies notes and standing add-ons
- Pets: name, kind, temperament, and where they will be during the clean
- Preferred frequency, day, and arrival window

Rule: the home profile is read before every visit and updated after any visit where reality differed from the profile. A change requested verbally on site is entered into the system the same day — verbal-only changes do not exist.

8.7 Change requests

Customers submit reschedule, skip, cancel, or scope-change requests through the portal. The office responds inside the system so there is one record. Target response: same business day.

8.8 The admin control center

Area	Use it for
Overview	Daily triage: new bookings, leads, change requests, returning-contact alerts
Bookings	Schedule, status, address detail, crew assignment
Leads	Advertising and campaign leads, template-driven follow-up email with live preview
Applications	Hiring pipeline
Change requests	Customer reschedules and scope changes
Properties	Apartment and property-management accounts
Franchise	Ownership candidate pipeline
Pricing	Service rates and add-ons — the single source the quote engine reads
Content	Public site copy
Emails	Template library, overrides, duplicates, test sends, delivery log
Team	Roles and access
Conversations	Chat and voice assistant transcripts
Marketing channels	Facebook and Nextdoor connections, lead sync, insights

Access control. Roles are assigned in the Team area. Access is granted by role, never shared logins, and removed the same day a person leaves.

8.9 Data handling

Client addresses, entry codes, alarm instructions, and photos are confidential business records. They are accessed only through the platform, never copied into personal notes, texts, or photo libraries, and never discussed outside the crew. Job photos are taken in the service app or company account and deleted from any personal device immediately after upload. Violation is grounds for termination.

9. Team Training Modules & Certification Tracking

All new hires complete Modules 1–7 before working unsupervised. Supervisors re-certify staff annually and after any incident or QA score below 80.

Module 1 — Orientation & professionalism

- Brand story, service promise, and the locally-owned standard
- Uniform, grooming, punctuality
- Client communication: what to say, what to escalate, how to handle out-of-scope requests
- Confidentiality: no photos or social posts of client homes, no discussing other clients
- **Assessment:** written quiz (90% to pass) plus a client-greeting role play

Module 2 — Core technique & standards

- Top-to-bottom, back-to-front method
- Section 4 checklists and Section 5 procedures
- Time targets per room by home size
- Tool technique: microfiber folding, mop handling, vacuum patterns
- **Assessment:** supervised practice clean scored against the Section 10.3 self-inspection

Module 3 — Chemical safety & equipment

- Reading SDS sheets; secondary container labeling
- The approved list, dilutions, dwell times, and compatibility
- Never-mix rules; spill and exposure response
- PPE and ventilation
- **Assessment:** written exam on compatibility — **100% required**, zero tolerance — plus a PPE demonstration

Module 4 — Safety & emergencies

- Lifting, step-stool safety, repetitive strain prevention
- Wet-floor and slip hazard control
- Client medical emergency, fire, or break-in discovery
- Bloodborne pathogen and biohazard non-scope boundaries
- Incident report walkthrough (Appendix G)
- **Assessment:** scenario-based verbal assessment with supervisor sign-off

Module 5 — Customer service & problem resolution

- On-site de-escalation and when to call the supervisor
- Scope boundaries (Section 2.4)
- Documenting pre-existing damage before starting
- Before/after photo standards

- **Assessment:** dissatisfied-client role play

Module 6 — Quality assurance

- The scorecards from the auditor's point of view
- Building the pre-departure self-inspection habit
- How QA scores affect reviews, incentives, and route assignment
- **Assessment:** mock self-audit reviewed by a supervisor

Module 7 — Specialty lines: turnovers, events, and apartment turns

- Airbnb turnover: the clock, staging to listing photos, linen inspection, restock par levels, damage documentation, and the turnover report
- Post-event: trash-out sequencing, spot treatment limits, glassware handling
- Apartment turns: lease-ready standard, unit-ready photo set, key handoff and logging
- Property-manager communication: report, never negotiate
- **Assessment:** one supervised turnover and one supervised turn, each scored 90+

9.1 Certification and refresher schedule

Requirement	Frequency
Modules 1–6 complete	Before the first unsupervised job
Module 7 complete	Before working any turnover, event, or apartment turn
Chemical safety refresher (Module 3)	Annually and on any new chemical introduced
Full re-certification	Annually, after any QA score below 80, or after any safety incident
Supervisor shadow evaluation	First job, 30 days, 90 days

9.2 Training sign-off log

Employee	Module	Date completed	Trainer	Score	Signature

(Full-page reproducible form: Appendix D.)

10. Quality Assurance Audit Scorecards

All scorecards use a 0–100 scale with a passing threshold of **90**.

10.1 Field supervisor on-site audit

Unannounced, minimum once per crew per month, and always after a client complaint.

Category	Max	Score	Notes
Punctuality, uniform, and ID	10		
Checklist completion for the tier booked	25		
Kitchen quality (5.1)	15		
Bathroom quality (5.2)	15		
General dusting and floors (5.3–5.5)	15		
Chemical, equipment, and color-code compliance	10		
Client property care	5		
Conduct and communication	5		
Total	**100**		Passing: 90+

Scoring guide: 95–100 excellent · 90–94 good, verbal coaching note · 80–89 needs improvement, formal coaching plus re-audit within two weeks · below 80 retraining before the next assignment, documented in the personnel file.

10.2 Customer satisfaction scorecard

Sent after every visit; results feed crew reviews.

Question	Scale
Overall satisfaction with this cleaning	1–5
Was the team punctual and professional?	1–5
Cleanliness of the kitchen	1–5
Cleanliness of the bathrooms	1–5
Cleanliness of bedrooms and living areas	1–5
Would you recommend Astro Maids to a neighbor?	Yes / No
Open comments	Free text

Escalation rule: any score of 1–2, or any "No", triggers a supervisor call within 24 hours and a

review of that visit's checklist and photos.

10.3 Technician self-inspection (pre-departure)

Completed by the Team Lead before leaving every job.

Area	Check
Kitchen	Counters clear · sink shining · floor dry and clean · trash emptied
Bathrooms (each)	Toilet disinfected · shower free of residue · mirror streak-free · floor clean
Bedrooms (each)	Bed made · surfaces dusted · floor vacuumed or mopped
Living areas	Furniture dusted · pillows arranged · floor clean
Whole home	All trash removed from the property · lights and fans as found · doors locked per instruction · all equipment and chemicals packed
Documentation	Photos captured · checklist submitted · home profile discrepancies noted

10.4 Turnover-specific QA (Airbnb and apartment)

Category	Max	Score
On time for the check-in or turn deadline	15	
Linen standard: inspected, stain-free, staged to photo	20	
Kitchen reset and inventory accuracy	15	
Bathroom standard and staging	15	
Restock accuracy against par levels	10	
Photo set complete and usable	15	
Report submitted before departure with damage and maintenance flags	10	
Total	**100**	

10.5 Location compliance audit

Quarterly per location, or at renewal review.

Category	Max	Score
Adherence to checklist standards (spot-check 3 recent jobs)	20	
Chemical and equipment inventory matches Sections 6–7	15	

Category	Max	Score
SDS binder and secondary labeling compliance	10	
Training records complete for all active staff	15	
QA scorecard usage and documentation on file	15	
Customer satisfaction average, trailing 90 days	15	
Insurance, licensing, and local regulatory compliance **[LOCAL]**	10	
Total	**100**	

Below 80 triggers a formal improvement plan with a re-audit inside 30 days.

11. Health, Safety & Compliance

11.1 Regulatory framework [LOCAL — verify with counsel and your insurance broker]

- OSHA Hazard Communication Standard: SDS access and secondary labeling. Confirm the current federal requirements and whether any state plan provisions apply in Texas.
- EPA rules governing disinfectant claims and green-cleaning certifications.
- Local business licensing, bonding, and insurance requirements for North Dallas and the Park Cities.
- Background check policy for every person entering a client home; completed and verified before the first solo assignment.

Nothing in this section is legal advice. Verify each item with qualified counsel before relying on it.

Local compliance record	Fill in
Business license number and renewal date	_____
General liability carrier and policy number	_____
Janitorial bond carrier and amount	_____
Workers' compensation carrier	_____
Background check vendor	_____
SDS binder location	_____

11.2 PPE minimum standards

- Gloves during all chemical application and all toilet and trash handling.
- Closed-toe, slip-resistant footwear at all times.
- Eye protection available, and required when handling concentrated descaler (C-7) or diluting.

11.3 Incident reporting

Any injury, property damage, chemical exposure, or safety-related client complaint is reported to the supervisor the same day on the Incident Report (Appendix G), regardless of severity. Property damage is photographed before anything is moved or cleaned.

11.4 Insurance and bonding [LOCAL]

Maintain general liability, janitorial bonding, and workers' compensation coverage at or above the minimums required by law and by any future franchise agreement. Certificates are renewed annually and filed with the owner's records.

11.5 Client home security

- Entry codes and alarm instructions are accessed only in the platform and never written down, texted, or shared.
- Keys and fobs are logged in and out by name, property, date, and time.
- Doors are locked and alarms are re-armed per the home profile before departure — this is the last item on the self-inspection for a reason.

12. North Dallas and Collin County Market Playbook

This chapter is local context. A location in another market replaces it with its own.

- **Core service area:** North Dallas and the Park Cities, extending to Collin County, Frisco, Plano, University Park, Addison, Southlake, and McKinney. Confirm drive time before accepting work at the edges — a job that cannot be reached on time is a job that damages the brand.
- **Seasonality:** short-term rental turnovers peak from spring through early fall around the lake, with weekend check-in and check-out clustering that makes Friday and Sunday the highest-pressure days. Holiday and event work concentrates in November and December, and graduation and family gathering work in May.
- **Weekend staffing rule:** turnover-capable crews are scheduled first for Friday and Sunday windows; recurring residential work is scheduled Monday through Thursday wherever the customer will allow it.
- **Referral culture:** in a market this size, the neighbor's opinion is the marketing channel. Every complaint is treated as a public event, and every recovery is treated as an investment.
- **Local partners to develop:** short-term rental hosts and property managers around the lake, apartment communities and student housing near North Texas State University, realtors handling move-out cleans, and event venues.
- **Weather:** heat and storm season affect both scheduling and drive time. Crews confirm access and road conditions before lake-area routes and never take on standing-water cleanup.

Local operating detail	Fill in
Office phone answered by	_____
Laundry / linen partner	_____
Preferred handyman for maintenance flags	_____
Carpet and upholstery specialist referral	_____
Waste disposal for large trash-outs	_____

13. Appendices (Forms & Templates)

Appendix	Form
A	Printable master cleaning checklist, all tiers (Section 4)
B	Room-by-room quick-reference field cards (Section 5)
C	SDS binder index
D	Training sign-off log, full page (Section 9.2)
E	Client chemical waiver
F	Weekly vehicle restocking checklist
G	Incident report
H	New client walkthrough and pre-existing condition form
I	Post-visit client satisfaction survey
J	Airbnb turnover report (Section 4.9)
K	Apartment turn report and key handoff log (Section 4.11)
L	Home profile intake sheet: entry, pets, preferences (Section 8.6)

Appendix D — Training sign-off log

Employee	Module	Date	Trainer	Score	Signature

Appendix G — Incident report

Field	Entry
Date and time of incident	
Property / client	
Crew present	
Type: injury / property damage / chemical exposure / other	
Description of what happened	
Photos taken (Y/N)	
Immediate action taken	
Supervisor notified (name and time)	
Follow-up required
